ITA0373-MOBILE COMPUTING

1.Use Figma to create an interactive diagram illustrating the components of a basic cellular system.

PROCEDURE:

1. Open Figma and create a new design file.
2. Create a frame with a suitable title, “Basic Cellular System.”
3. Add components such as Mobile Station (MS), Base Transceiver Station (BTS), Base Station Controller (BSC), Mobile Switching Centre (MSC), and Public Switched Telephone Network (PSTN).
4. Arrange the components in a logical sequence using rectangles and suitable icons.
5. Connect the components using arrows to represent communication and signal flow.
6. Use different colors to distinguish mobile devices, base stations, and switching networks.
7. Add labels and short descriptions for each component.
8. Use Figma’s Prototype mode to create interactive connections between components, allowing users to click on them to view their functions.
9. Preview the prototype, verify the connections, and save the design.

OUTPUT:

Result:

An interactive diagram illustrating the components of a basic cellular system was created using Figma, showing the communication flow between mobile stations, base stations, switching centres, and the telephone network.
