**10. Create a visual representation in Figma showcasing the differences between various multiple access techniques**

**PROCEDURE:**

1. Open Figma and create a new design file.
2. Create a frame and add the title “Multiple Access Techniques.”
3. Divide the frame into four sections.
4. Label the sections FDMA, TDMA, CDMA, and OFDMA.
5. Draw simple diagrams showing frequency division, time-slot division, code-based sharing, and orthogonal subcarrier allocation.
6. Use different colors to distinguish users and resources.
7. Add one short description under each diagram.
8. Align the sections and save the design.

**OUTPUT:**

**Result:**

A visual comparison of FDMA, TDMA, CDMA, and OFDMA was created in Figma, illustrating how each technique allows multiple users to share communication resources.
