ITA0373-MOBILE COMPUTING

2.Design a user interface prototype for a mobile station using Figma, considering connectivity and convenience.

PROCEDURE:

1. Open Figma and create a new design file.
2. Create a mobile-sized frame using a suitable smartphone preset.
3. Design a simple home screen with network signal, battery status, and connectivity indicators.
4. Add UI elements such as Wi-Fi, mobile data, Bluetooth, call, and message icons.
5. Include buttons for enabling or disabling connectivity features.
6. Arrange the elements neatly with clear labels, readable fonts, and suitable colors.
7. Use Prototype mode to connect the buttons to corresponding screens or interactive states.
8. Preview the prototype and verify that the navigation and interactions work correctly.

OUTPUT:

Result:

A mobile station user interface prototype was designed using Figma, incorporating connectivity controls and a user-friendly layout for convenient access to mobile network features.
