ITA0373-MOBILE COMPUTING

4.Create a visual representation in Figma highlighting the key elements of mobile network protocol stacks.

PROCEDURE:

1. Open Figma and create a new design file.
2. Create a frame with a light-gray dotted background.
3. Draw stacked rectangular boxes to represent the protocol layers.
4. Add the following layers from top to bottom: Application, Transport, Network, Data Link, and Physical.
5. Use different light colors to distinguish each layer.
6. Add examples such as HTTP, TCP/UDP, IP, Ethernet, and physical signals.
7. Draw arrows between the layers to indicate data flow.
8. Align the boxes neatly and use readable fonts and labels.
9. Preview the design and save the Figma file.

OUTPUT:

Result:

A visual representation of mobile network protocol stacks was created in Figma, illustrating the layered architecture and the role of each layer in communication between mobile devices and networks.
