7. Develop a dashboard prototype in Figma displaying performance criteria for a cellular system

PROCEDURE:

1. Open Figma and create a new design file.
2. Create a desktop frame for the cellular system dashboard.
3. Add a title, “Cellular Network Performance Dashboard.”
4. Draw boxes to display Signal Strength, Network Speed, Call Drop Rate, and Network Availability.
5. Add simple bar charts or progress bars to represent the performance values.
6. Use different colors and labels to make the dashboard easy to understand.
7. Arrange the components neatly and save the design.

OUTPUT:

Result:

A cellular system performance dashboard prototype was designed in Figma to display important network performance criteria.
